

Phenomenal Penguins

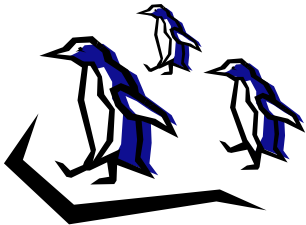

Animal Adaptations!

Not all penguins live in the Antarctic.

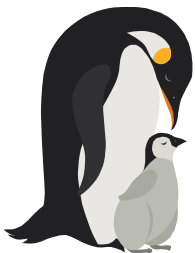

List the five penguins that breed in Antarctica.

1. _____
2. _____
3. _____
4. _____
5. _____

Select a penguin that breeds in Antarctica. Draw a picture of this penguin in the box below.

List four adaptations and describe why you think this penguin is well-suited for its environment.

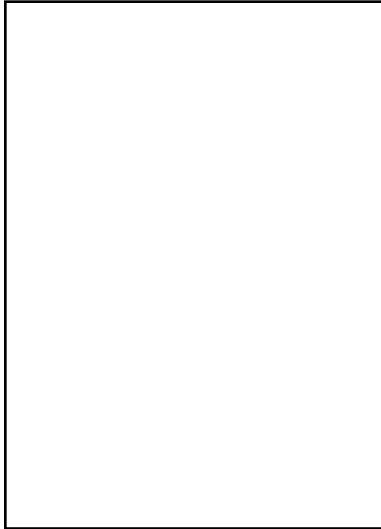

1. _____
2. _____
3. _____
4. _____

There are 17 species of penguins illustrated in the exhibition.

Compare and contrast three species of penguins.

Draw the penguins you have selected in the boxes below.

List their distinguishing characteristics such as diet, height, and range in the spaces provided:

Penguins live in large colonies. How do they recognize each other?

Animal Adaptations!

What is a frigatebird and why is it so unique?

Why is krill so vital to the Antarctic food chain?

**Choose another Antarctic animal that calls the South home.
Draw a picture of the animal in the box below.**

A large, empty rectangular box with a black border, intended for a drawing of an Antarctic animal.

List four adaptations and explain why you think each adaptation helps make the animal well-suited to its environment.

1. _____

2. _____

3. _____

4. _____
